ABSTRACT:

PROBLEM TO BE SOLVED: To provide a skin washing agent improving washing property, humidity keeping property or skin stimulation property and imparting a skin wound treatment-accelerating effect.

SOLUTION: This skin washing agent having a new skin care function is obtained by mixing and kneading single Agaricus mushroom aqueous extract solution or a combination of the solution with one selected from an aqueous solvent extract solution of foliage of papaya, an aqueous solvent extraction solution of succulent shoot of ume apricot and a concentrated saline water extract solution of an ume fruit to a soap crude material of a natural purified oil and fat. By using the skin washing agent in this invention in a face washing or bathing, dirt of the skin is efficiently removed and imparts the skin an excellent humidity keeping feeling, then a treatment accelerating effect for skin wound can be obtained.
